

Engineering and Design
SAND BYPASSING SYSTEM SELECTION

Table of Contents

Subject		Paragraph	Page
CHAPTER 1. INTRODUCTION			
	Purpose	1-1	1-1
	Applicability	1-2	1-1
	References	1-3	1-1
	Bibliography	1-4	1-2
	Background	1-5	1-2
	Discussion	1-6	1-2
	Overview of Manual	1-7	1-2
	How to Use This Manual	1-8	1-3
CHAPTER 2. CHARACTERIZING THE BYPASSING SYSTEM			
Section I.	Problem Identification The Bypassing Problem	2-1	2-1
Section II.	Problem Classification Site Study and Problem Formulation Consideration of Bypassing Alternatives Bypassing System Classification Classification Overlap Equipment System Purpose Design Cautions	2-2 2-3 2-4 2-5 2-6 2-7 2-8	2-2 2-3 2-3 2-4 2-4 2-4 2-5
CHAPTER 3. BASIC SAND BYPASSING CONCEPTS			
	Introduction	3-1	3-1
	Summary of Concepts	3-2	3-1
Section I.	Operation Mode Interception Storage Area	3-3 3-4	3-1 3-3
Section II.	Operation Schedule Continuous Periodic	3-5 3-6	3-5 3-7
Section III.	Application of Bypassing Concepts to Problem Characterization Examples	3-7	3-7

	Subject	Paragraph	Page
CHAPTER 4.	COASTAL PROCESSES STUDY, SITE INVESTIGATIONS		
	Introduction	4-1	4-1
Section I.	Coastal Processes Study		4-1
	Sediment Budget	4-2	4-1
	Sources of Information	4-3	4-1
	Waves and Water Levels	4-4	4-2
	Longshore Sediment Transport	4-5	4-6
	Cautions in Using Longshore Transport Rates	4-6	4-8
	Storms	4-7	4-10
Section II.	Site Characterization		
	General	4-8	4-12
	Social/Environmental Factors	4-9	4-12
	Erosion and Accretion	4-10	4-13
	Sediment Analysis	4-11	4-15
	Structures	4-12	4-18
	River and Stream Outflows	4-13	4-18
	Inlets	4-14	4-18
	Coastal Bathymetry and Topography	4-15	4-21
CHAPTER 5.	BYPASSING SYSTEMS AND DESIGN CONSIDERATIONS		
	Introduction	5-1	5-1
Section I.	Fixed Systems		
	General	5-2	5-1
	Fixed System Components	5-3	5-2
	Jet Pump Systems	5-4	5-3
	Submersible Pumps	5-5	5-6
	Fixed System Operation	5-6	5-8
	Dragscraper Dredging	5-7	5-8
	Advantages/Disadvantages	5-8	5-9
	Fixed System Cost Estimates	5-9	5-9
Section II.	Mobile Systems		
	General	5-10	5-10
	Dredging Procedures and Selection	5-11	5-10
	Transportable Breakwaters	5-12	5-13
	Sloping Float Breakwaters	5-13	5-13
	Hopper Dredges	5-14	5-13
	Mechanical Dredging	5-15	5-15
	Truck/Trailer Mounted Systems	5-16	5-15
Section III.	Semimobile Systems		
	General	5-17	5-16
Section IV.	Beach Placement Considerations		
	General	5-18	5-17
	Point of Discharge Considerations	5-19	5-17

	Subject	Paragraph	Page
	Material Spreading and Equipment Storage	5-20	5-19
Section V.	Deposition Basin and Weir System Design		
	Deposition Basins	5-21	5-19
	Weir Systems	5-22	5-25
Section VI.	System Components and Miscellaneous Considerations		
	General	5-23	5-31
	Other Dredging Equipment and Considerations	5-24	5-31
	Structures and Structural Design	5-25	5-33
	Pipelines	5-26	5-33
	Guidelines on Pipeline Selection and Installation	5-27	5-33
	Fluidizers	5-28	5-36
	Other Equipment and Considerations	5-29	5-42
CHAPTER 6.	LESSONS LEARNED		
	Introduction	6-1	6-1
Section I.	Impacts of Lack of Coastal Processes Information		
	Introduction	6-2	6-1
Section II.	Fixed Plant		
	General	6-3	6-4
	Recommendations for Semimobile Jet Pump Systems	6-4	6-4
	Debris	6-5	6-7
	Craters	6-6	6-8
	Fixed Plant Design	6-7	6-8
APPENDIX A	BIBLIOGRAPHY		A-1
APPENDIX B	COASTAL PROCESSES STUDY EXAMPLE--OCEANSIDE, CALIFORNIA		B-1
APPENDIX C	MAJOR COMPONENTS AND PRICES FOR THE INDIAN RIVER INLET, DELAWARE, SAND BYPASS SYSTEM		C-1
APPENDIX D	STUDY OF SAND BYPASSING OPTIONS AT CAPE MAY INLET, NEW JERSEY		D-1
APPENDIX E	SAND BYPASSING CASE STUDIES		E-1
